Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I as viewed in Figures 1-8 and 15.

Species II as viewed in Figure 9.

Species III as viewed in Figures 10A and 10B.

Species IV as viewed in Figure 11.

Species V as viewed in Figure 12.

Species VI as viewed in Figure 13.

Species VII as viewed in Figure 14. ✓

Species VIII as viewed in Figure 16.

Species IX as viewed in Figure 17. ✓

Species X as viewed in Figure 18. ✓

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no claims which are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

The Election of Species requirement has been rewritten in order to clarify the Examiner's position in response to Applicant's comments. Claims 39 and 47 are not generic because claim 39 includes language directed to "two dividing elements...extending away from each other" and claim 47 includes claim language similar to claim 39 and further includes "substantially horizontally extending base". These claimed features are not generic to all species. Further, Figures 16-18 are distinct from each other because a single drawing can not show all the features of Figures 16-18. Additionally, Figure 16 includes a continuous base, not shown in Figure 18, Figure 17 includes an elevated wood structure not shown in Figures 16 and 18, and Figure 18 includes a non-continuous base.
